Learning Outcomes from: Mr Shekib Shahbaz –
Urologist

RENAL STONE DISEASE & UROLOGICAL LASER SURGERY

- Managing renal stone disease including utility of powerful holmium laser
- Explaining Laser surgery for BPH and bladder outlet obstruction
- Recognizing the advantages of powerful holmium laser over less powerful machines

Learning Outcomes from: Mr Ikram Nizam
Orthopaedic Surgeon

HIPS, KNEES & THE ADVANCED RECOVERY PROGRAM

- Knowing what the Enhanced Recovery Program is and how it benefits your patients
- Identify which patients are suitable for minimally invasive hip replacement and any contra-indications
- Understanding minimally invasive Knee replacement with 3D printed cutting blocks and planned templates before major knee surgery
- Awareness of better patient outcomes with early discharge, reducing history of DVTs/PEs & infection rates

Learning Outcomes from: Mr Matthew Claydon –
Vascular & Endovascular Surgeon

New Management Paradigms for Less Common Vascular Conditions

- Identifying and Investigating Popliteal Entrapment
- Understanding the Modern Management Paradigms
- Recognizing Neuro-Arterial and Venous Thoracic Outlet Syndromes
